

Nova Personnel/Fire Exit and Fire Rated Steel Doors

Nova supply, install and maintain all types of certified steel security and fire rated doors, all of the doors we supply can be made to suit your requirements which can range from different colours, glazing, louvres and entry systems.

All doors come with a 12 month warranty and can be custom made to suit your individual door opening size or specification.

Our doors are manufactured to stand up to the toughest environments with our high security steel doors designed to withstand various types of attack due to the doors deeper core and galvanized steel construction. Doors come complete with the most advanced and secure hinge and locking mechanisms as standard.

Doors are supplied in standard white with a powder coating service available to enable you to have the door colour of your choice.

Our single steel fire exit doors are secured with 3 stainless steel ball hinges, 4 dog bolts and an Exidor 296 single point push bar. Fire exit doors can be provided with external access for your door, we can provide Exidor outside access devices including knob, lever and even a code lock for maximum security.

We can also provide double emergency exit doors for door opening measurements ranging from 1295mm-1995mm in width.

As an addition Nova now offer Fire rated steel doors which expand into their frame under heat, sealing off a room where a fire has broken out to prevent the spread of smoke and flames. These doors play a vital role in emergency fire procedures and are generally installed to help you comply with fire safety legislation.

Nova steel fire rated doors have been tested to FD240 standards which means they are suitable for any applications requiring the following:

- FD30 – 30 minutes fire rated
- FD60 – 60 minutes fire rated
- FD120 – 2 hours fire rated
- FD180 – 3 hours fire rated
- FD240 – 4 hours fire rated
